# Grass Control in Corn, Cotton, and Soybean

### **Daniel Stephenson**

Professor/Extension Specialist – Weed Science

Research Coordinator - Dean Lee Research Station

### Old-school grass control

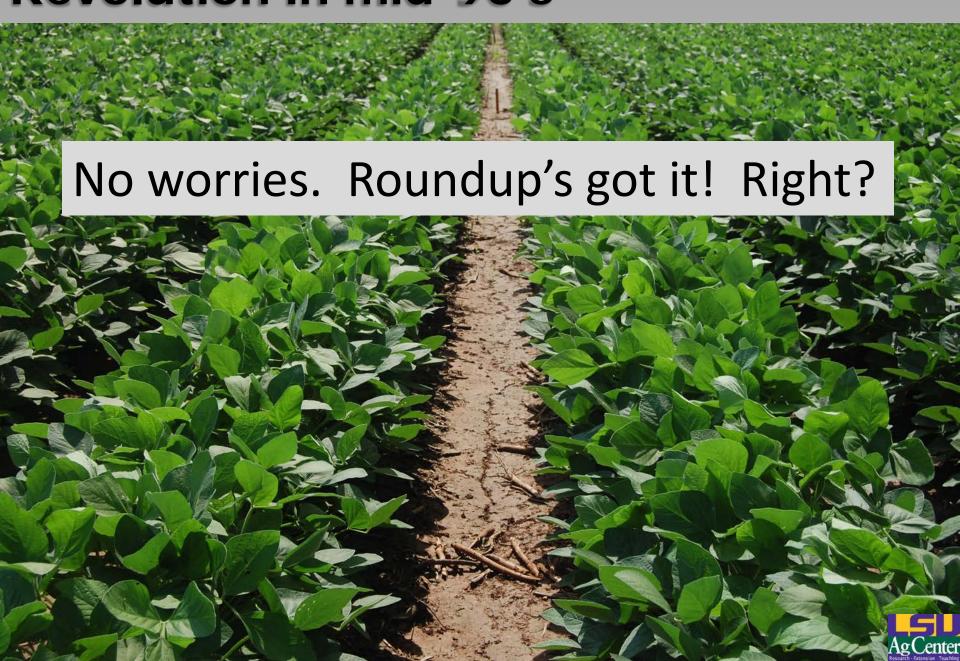

Corn	Cotton	Soybean
Acetochlor or metolachlor PRE and/or POST	Trifluralin PPI	Trifluralin PPI
Accent	Fluometuron +/- pendimethalin PRE	Alachlor, metolachlor PRE
	MSMA +/- prometryn or diuron directed	Graminicides as needed
	Graminicides as needed	

### Revolution in mid-90's

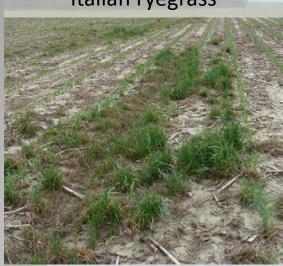

Italian ryegrass

goosegrass

### **GR** johnsongrass

### **GR** johnsongrass

### **GR** johnsongrass

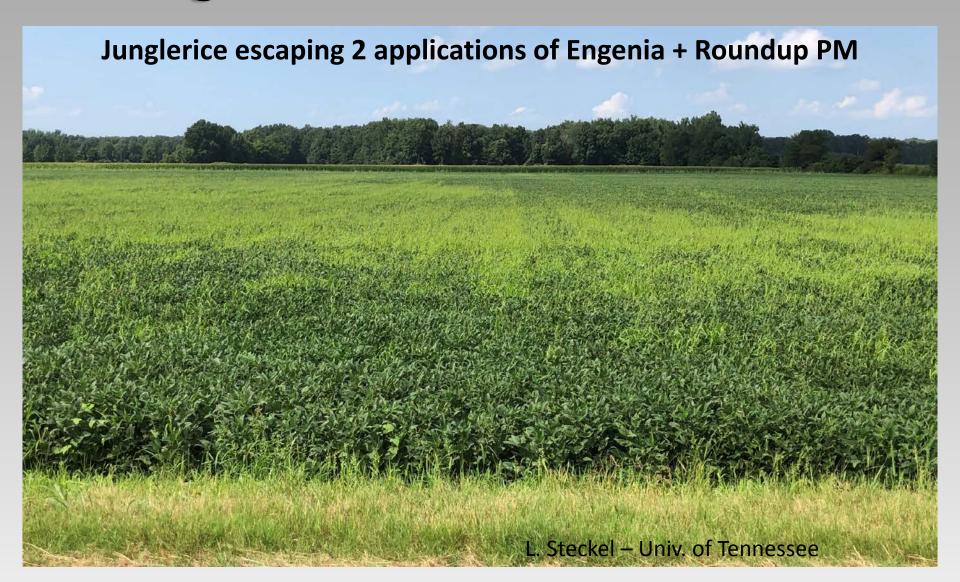

J. Bond – MS State Univ.

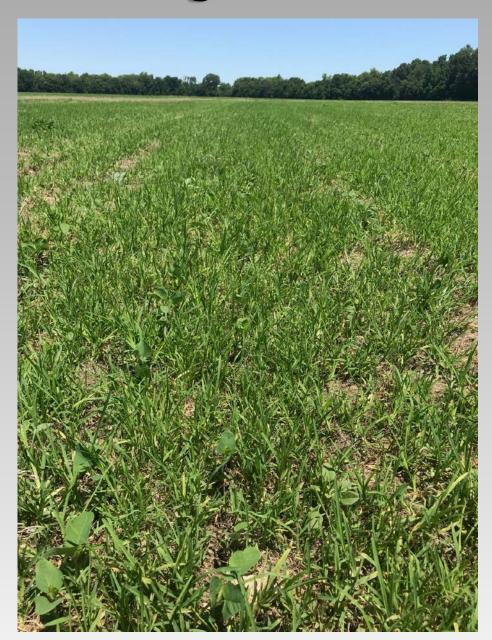

Junglerice escaping
2 applications of
Engenia + Roundup PM
in cotton

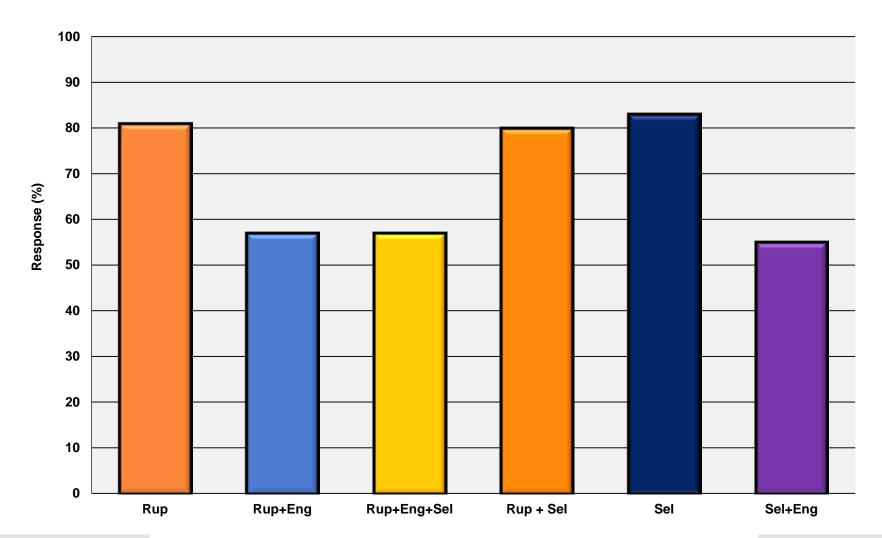

Goosegrass escaping
2 applications of
Engenia + Roundup PM
in soybean

## Response of Junglerice Screen to Selected Herbicides across 3 locations

### What is going on?

- Antagonism between dicamba and glyphosate or clethodim has been reported
- Rich Zollinger, Extension Weed Scientist at North Dakota St. Univ., posted on NDSU's Crop & Pest Report in 2017
  - <a href="https://www.ag.ndsu.edu/cpr/weeds/grass-antagonism-with-dicamba-clethodim-07-06-17">https://www.ag.ndsu.edu/cpr/weeds/grass-antagonism-with-dicamba-clethodim-07-06-17</a>
- Larry Steckel, Extension Weed Scientist at Univ. of Tennessee, posted on the Utcrops blog in 2019
  - <a href="https://news.utcrops.com/2019/07/dicamba-tank-mixing-with-glyphosate-and-or-clethodim-effect-on-junglrice-control/">https://news.utcrops.com/2019/07/dicamba-tank-mixing-with-glyphosate-and-or-clethodim-effect-on-junglrice-control/</a>
- Both reported antagonism of clethodim and/or glyphosate by dicamba
- Scientific literature indicates this as well

### What is going on?

 Poor coverage due to nozzles

- Poor coverage due to boom height
- Poor coverage due to sprayer speed
- Poor environmental conditions

### What is going on?

- Resistance
  - Goosegrass in MS and TN
  - Johnsongrass in MS and LA
  - Italian ryegrass MidSouth
  - Barnyardgrass/junglerice
    - Suspected populations in all MidSouth states

### Solution?

Don't tank-mix dicamba with clethodim...or any graminicide

- Program if you have GR Palmer amaranth and troublesome grasses
  - Spray dicamba alone
  - 5-7 days later, apply glyphosate + clethodim
- Old weed science rule
  - Broadleaf herbicide 1<sup>st</sup>, graminicide 7 days later
  - Graminicide 1<sup>st</sup>, broadleaf herbicide 2 days later

# Solution?
