Setting Up Your John Deere Green Star Monitor

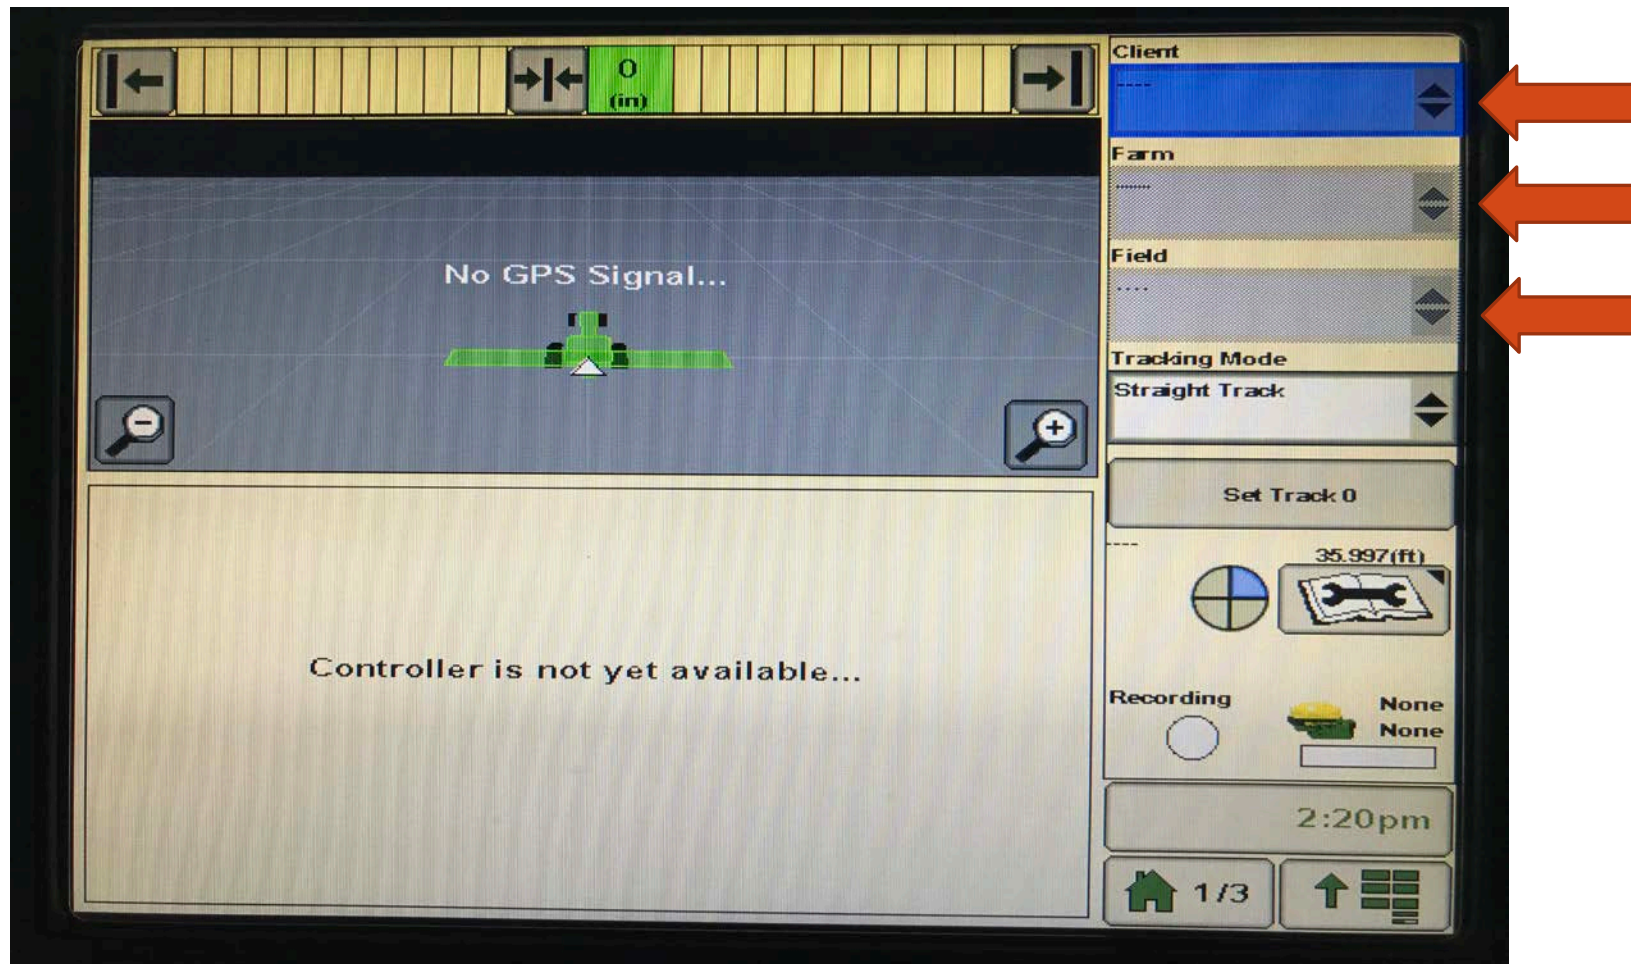

Presented By: Rich Lindsey
Cherokee Gin & Cotton Co.
Centre, Alabama

This information
isn't for me. Is
it?

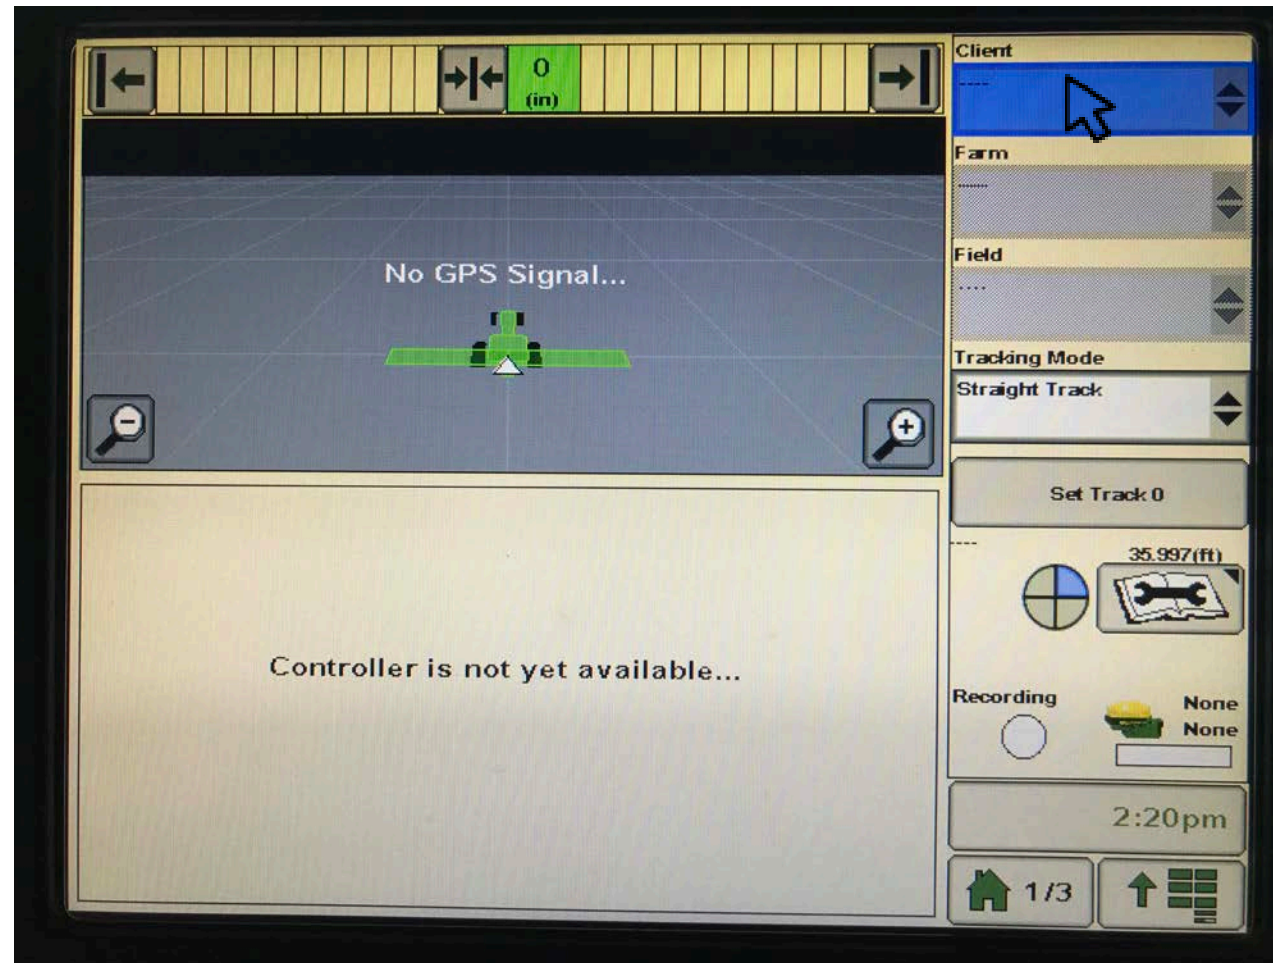

YES! This information is for all
growers who are:

- Utilizing a Green Star Monitor
- Utilizing any type of monitor or software for guidance, harvesting, or nozzle control

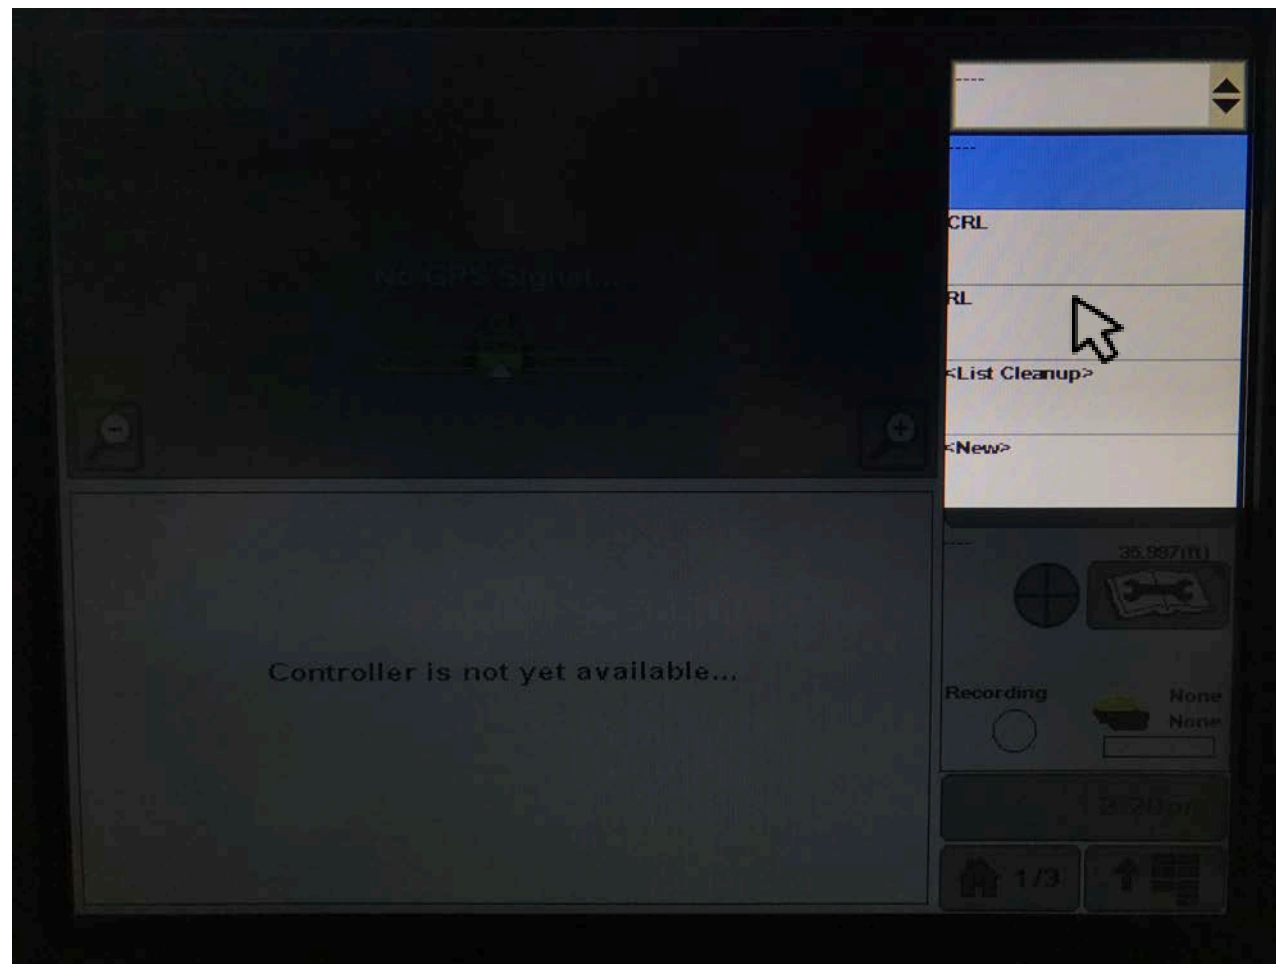

Some Data Fields must match Gin Data

The Client, Farm, and Field data that you have set up in your John Deere monitor must match the corresponding data fields at the gin

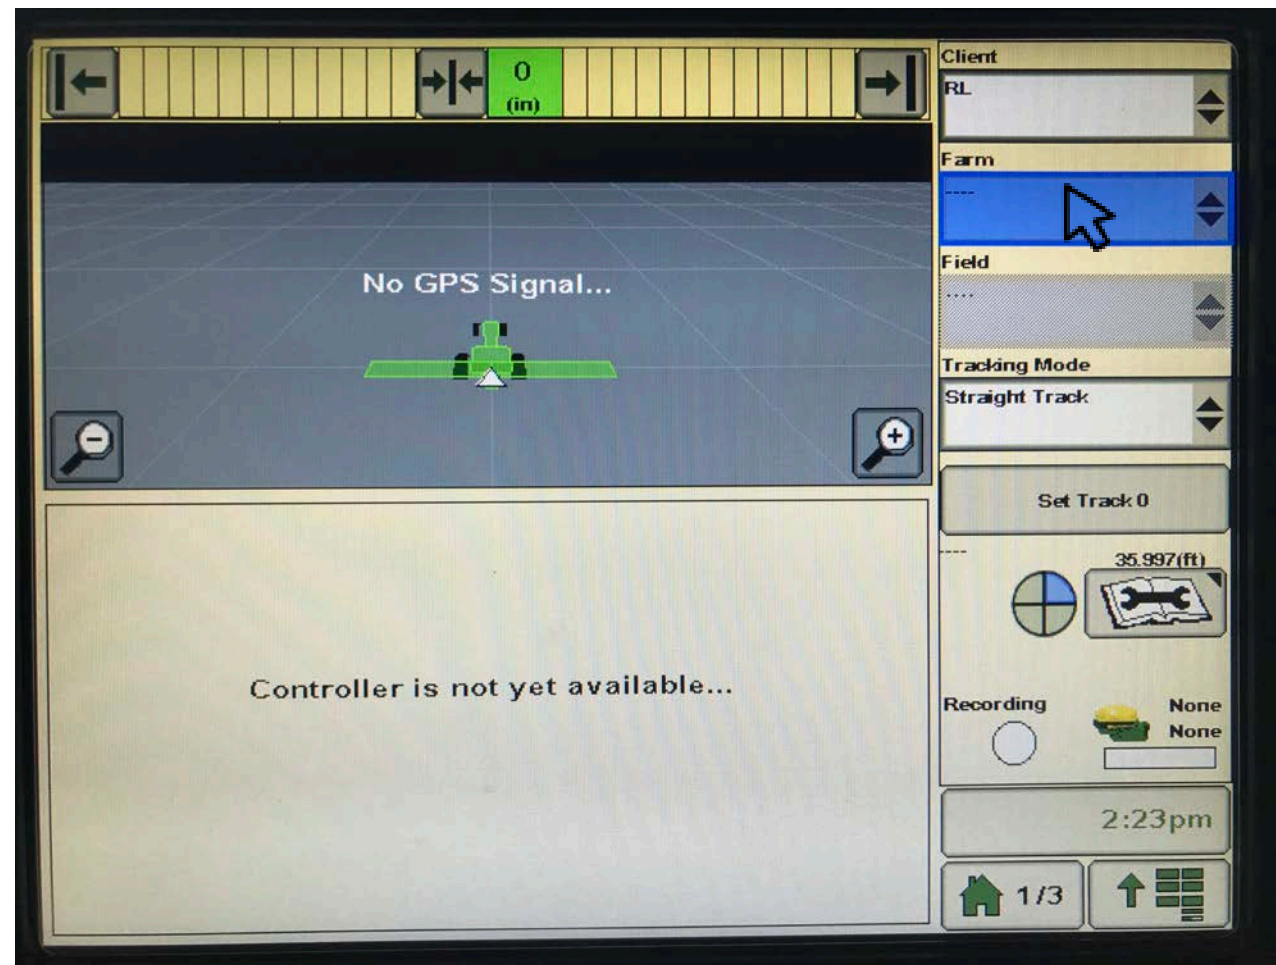

Client

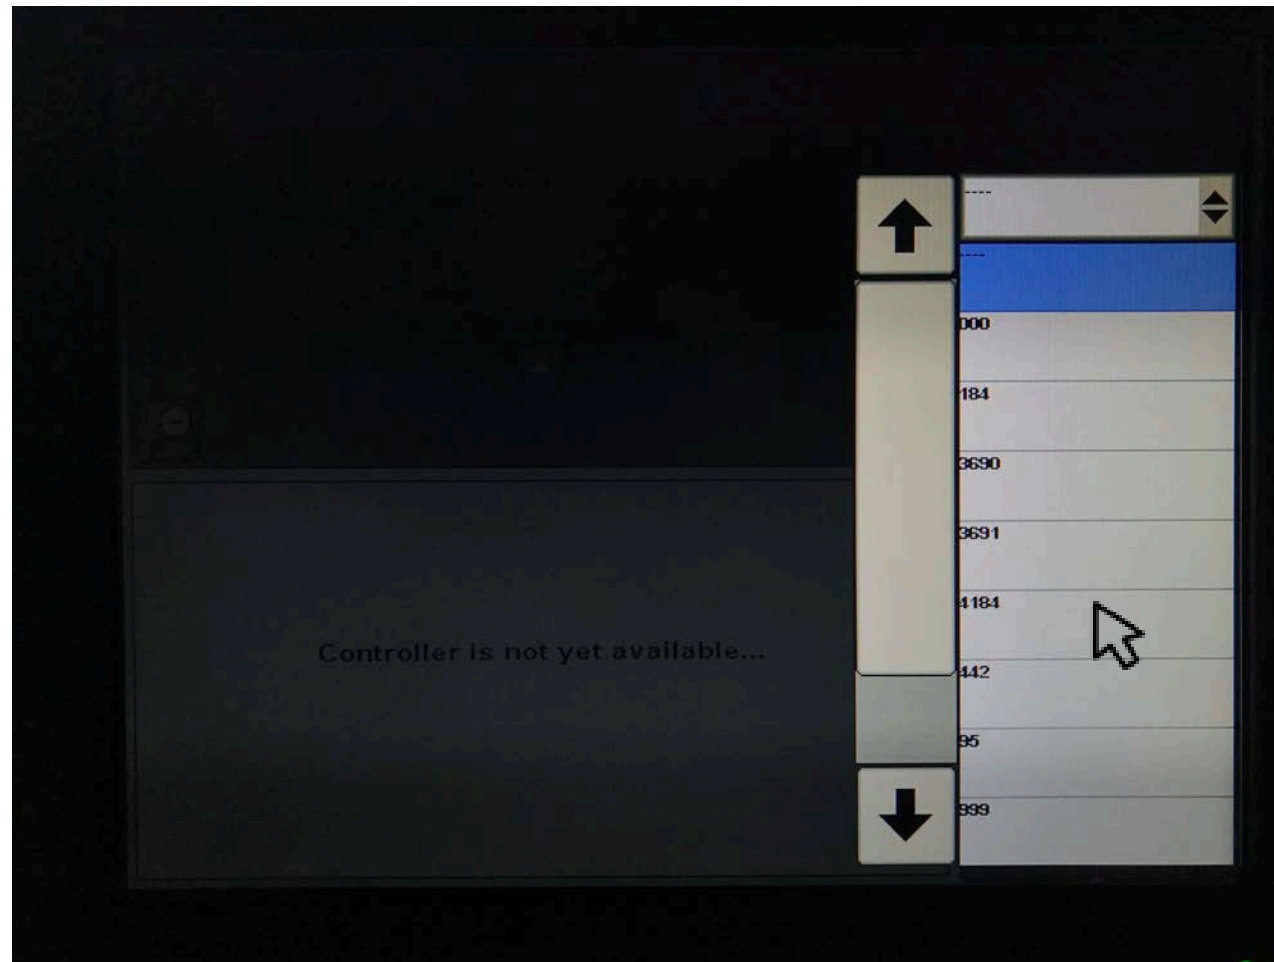

John Deere's Client = Gin's Producer ID

Gin's typically assign their own Producer IDs

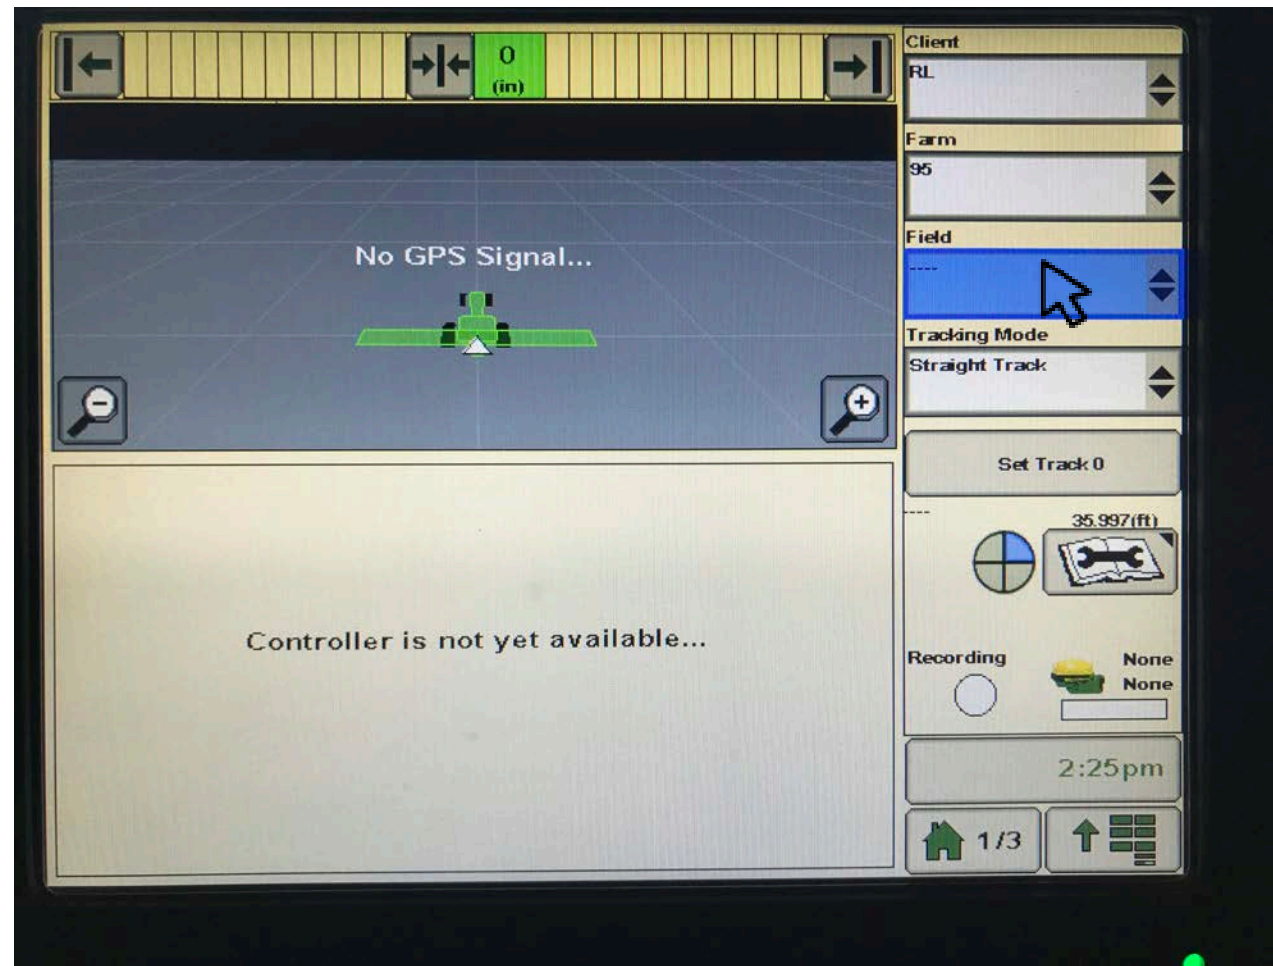

Farm

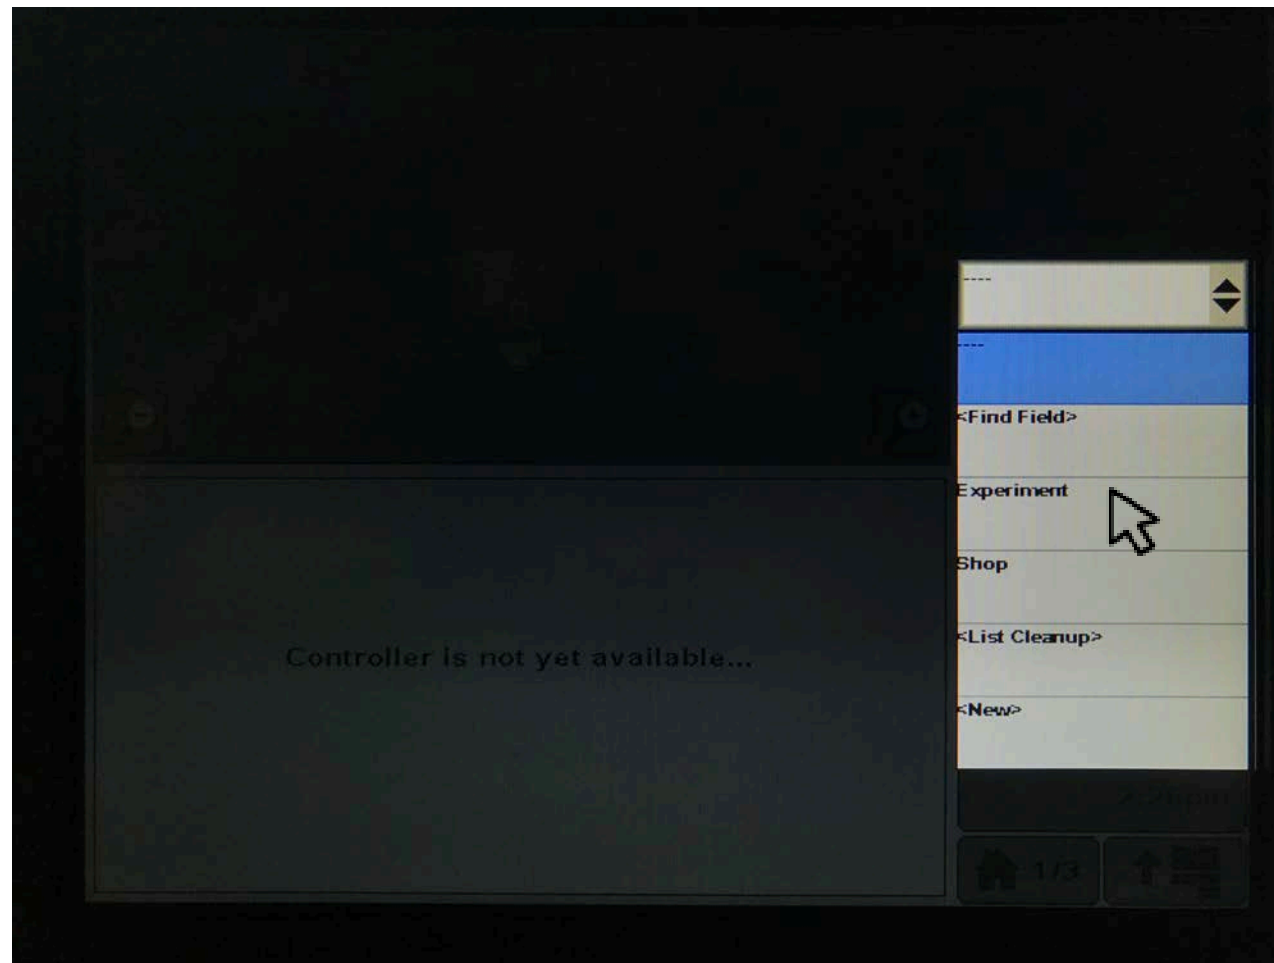

John Deere's Farm = Gin's Farm ID

Gin's use the Farm Service Agency's Farm Service Number (FSN) for the Farm ID

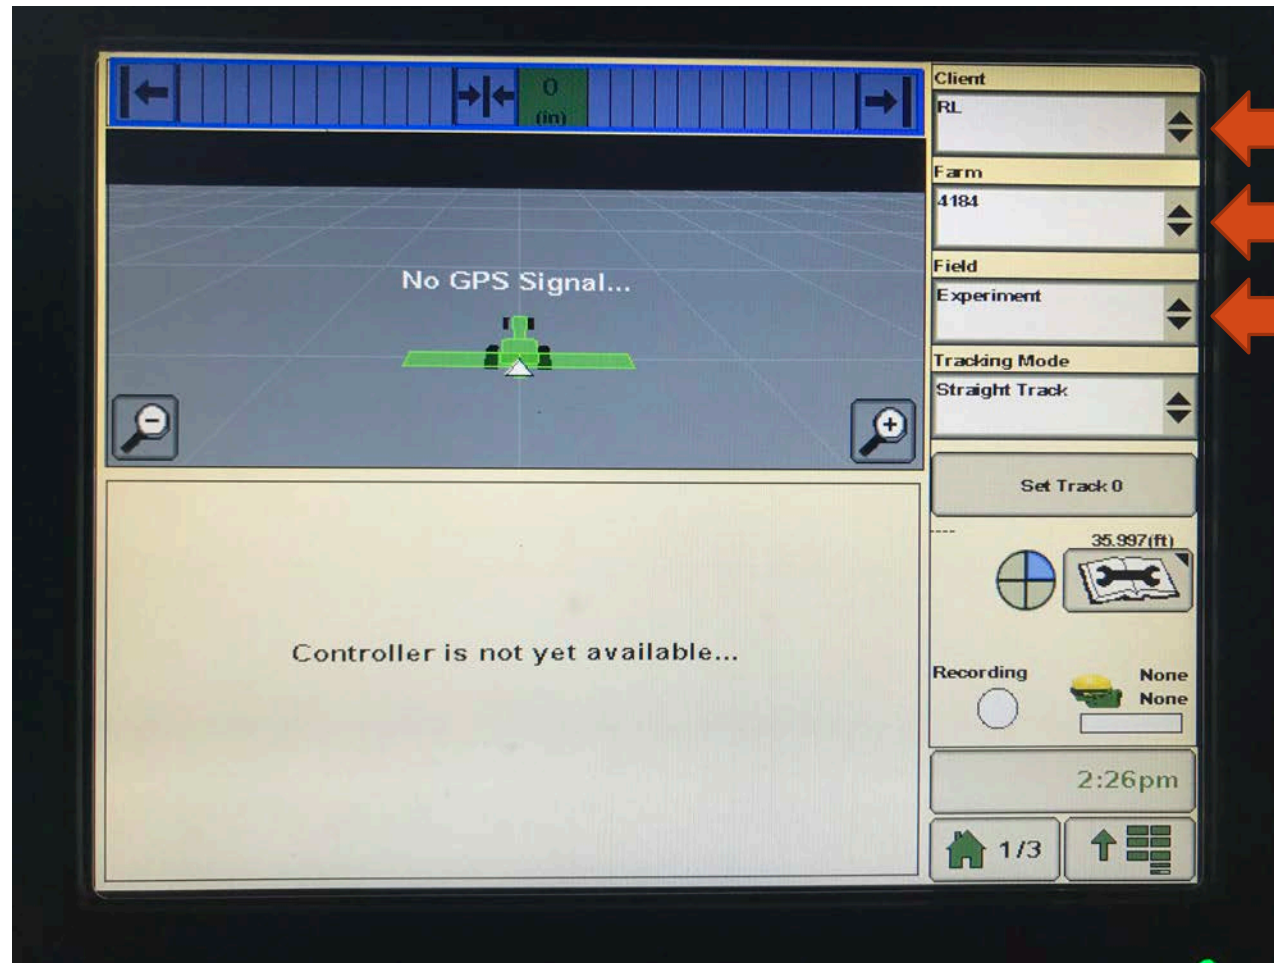

Field

John Deere's Field = Gin's Field ID

May be assigned by USDA or Gin

Finished Product

Cherokee Gin (CHER16) Farm & Field Listing

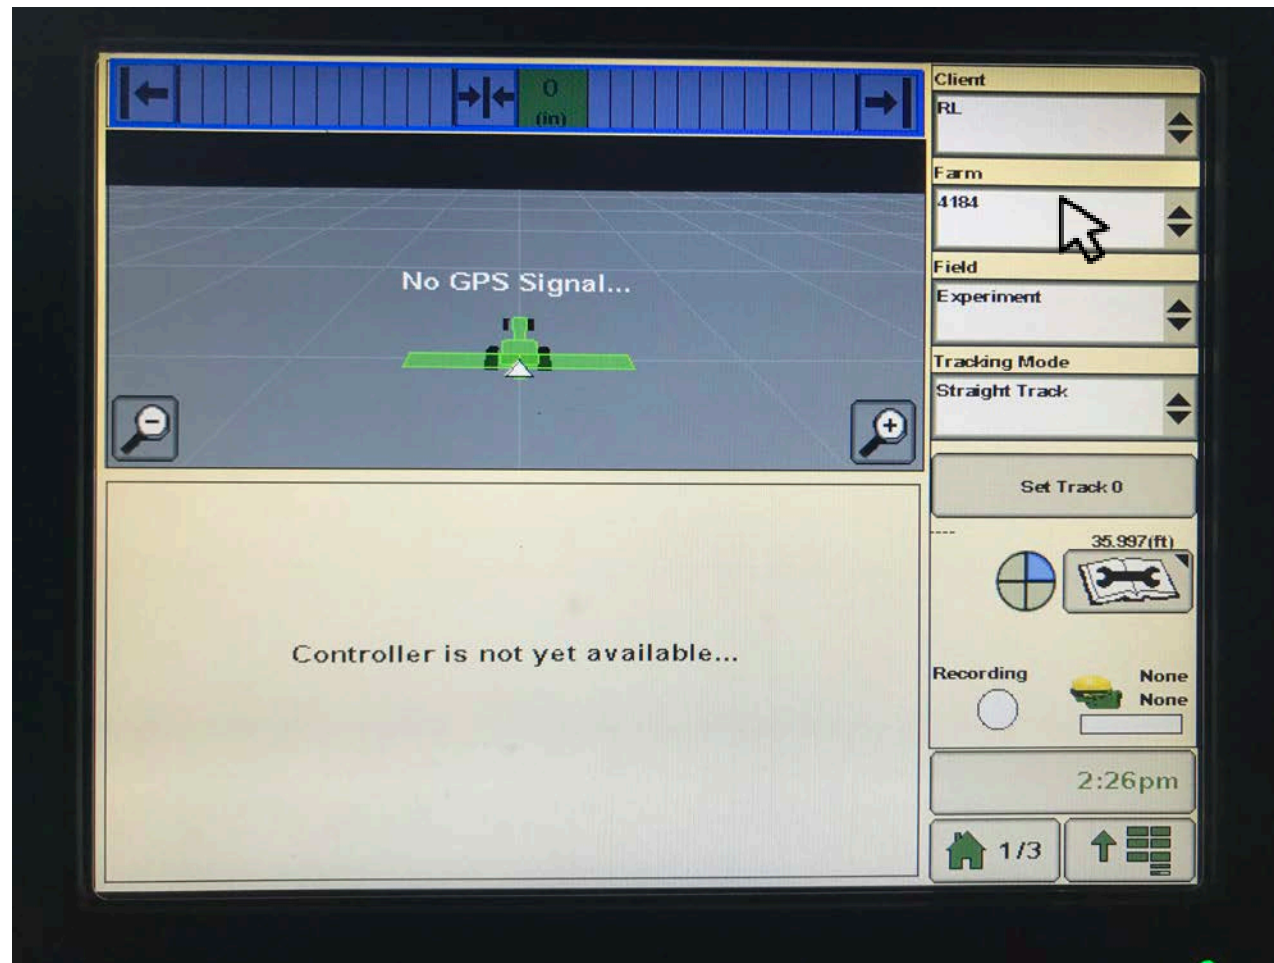

Inactive?: No
 Inactive?: No
 Producer ID: TF

Prod ID	Name	Farm ID	FSA #	Landlord Group	Seed%	Charge%	Dist%
TF	Test Farm	1000	0101901000
