

# Integrated Pest Management Panel

Kerry Siders, Blayne Reed, and Suhas Vyavhare

# REVIEW 2020

- Major insect pest challenges
  - Cotton
- Light worm pressure
- Other IPM issues (weeds, diseases)

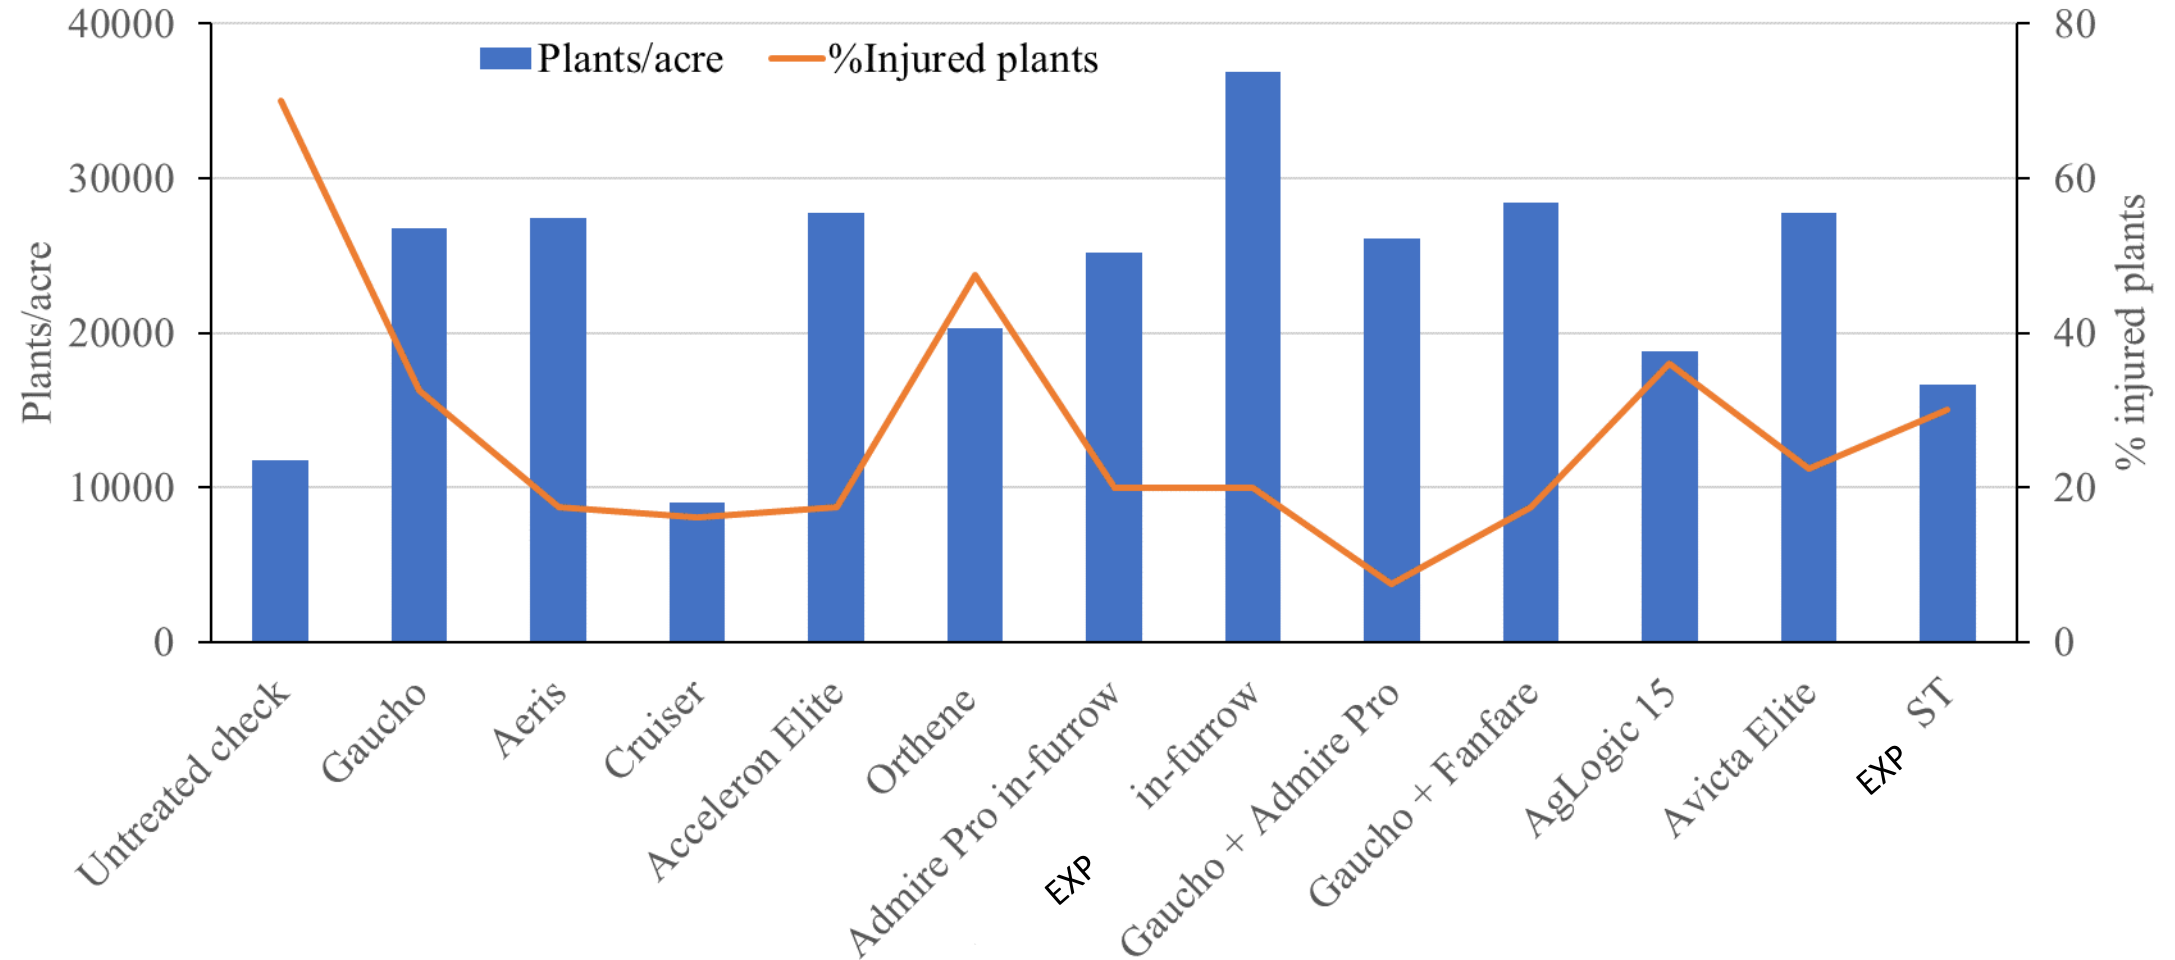

# WIREWORMS

---

# Impact of At-plant Treatments on Plant Stand

P= 0.0043 (plant stand); 0.0004 (%injured)

# Other/Emerging Issues

- Sugarcane aphid
- Armyworms in wheat
- Spider mites in corn
- Alfalfa weevil
- Sesame leafroller

A photograph of two men in a field. In the foreground, a man wearing a blue polo shirt and a brown cap with 'ATM' on it is holding a tablet. In the background, another man is operating a blue tractor. The field is filled with tall, green and yellow plants.

## Suggestions/Issues We See Going Forward

---

- Importance of field scouting
- Making effective sprays
- Cheap spray versus gaining control?
